Appendix A

Proposed New Claim

23. (New) A vehicle controller comprising,
- a rewritable memory configured to store a security function used to authenticate an external rewriting device to determine whether rewriting to the rewritable memory by the external rewriting device is permitted;
 - a controller configured to initiate an authentication process to authenticate the external rewriting device using the security function in response to a request to rewrite data held by the rewritable memory and upon authenticating the external rewriting device to delete the security function stored in the rewritable memory and to write a new security function into the rewritable memory; and
 - an interface configured to receive and transmit one or more signals between the controller and the external rewriting device.
